LEADING THE SUSTAINABILITY TRANSFORMATION - INTRODUCTION OF A CUSTOMER-CENTRIC METRIC FOR CO₂-REDUCED STEEL

Five categories differ by carbon load

- ✓ **Methodology along international standards**
Calculation methodology follows internationally renowned GHG Protocol
- ✓ **Emissions from raw material to production**
Emissions include production (Scope 1), purchased power (Scope 2) & supply chain (Scope 3 Upstream)
- ✓ **No offsetting included in CO₂ load categorization (compensation data as add-on)**
Physical production emissions determine categorization

One category differs by method

- ✓ **Separate category for "balanced" green steel**
Emission re-balancing between steel volumes from the same mill results in a calculated instead of a physical carbon footprint – separate class acknowledges efforts of players with physical reduction

Background on "balanced"

- All steel passing through a production pathway has the same physical carbon footprint
- Accounting-wise, this footprint is sometimes converted between steel quantities in tons of steel with higher and lower carbon footprints

DRIVING SUSTAINABLE BUSINESS OPPORTUNITIES & SECURING GREEN VOLUMES ALREADY AVAILABLE IN 2022

Pioneering sustainable solutions

Establishing **sustainable value chains for our customers** by supplying CO₂-reduced volumes...

- through **four partnerships**,
- across **categories**,
- across **product groups**,
- across **country organizations**

...already starting in 2022

>30% and >50% of volume in the most sustainable
“**Prime & Pro**” categories **by 2025 and 2030**, respectively

Savings of more than 4 million tons of CO₂ annually

DRIVING DIGITALIZATION AND HIGHER FOCUS ON AUTOMATION

Digitalization and automation further advanced

- **Digital sales share** at 46%, up by 1%p yoy, stable qoq

Kloeckner Assistant processed >€1bn of sales volume in 2021

- **Self-developed AI solution** improves strongly and automation rate increases

Global Transformation Project launched

- Enhancing **standardization** and **harmonization** of processes
- Achieving next level IT-services and driving **business model automation**

Dedicated execution of “Leveraging Strengths” strategy

MANAGING THE CYCLE IN 2021

- Consistent margin-over-volume strategy in 2021 and also going forward due to dynamic environment
- Recent NWC increase predominately price driven
- Gross profit per ton significantly outperforming previous years thanks to smart NWC management in times of record prices
- Stocks in Q4 2021 still below 2019-levels: Targeted restocking in the business areas with the highest margin expectations

EBITDA (€M) IN Q4 AND FY 2021

- Strongest operating result since IPO in 2006
- Driven by positive price dynamics, supported by consistent margin-over-volume strategy
- Positive price effects and windfall gains of ~€600m
- OPEX up especially driven by shipping & operating costs and wage inflation; thereof €48m directly price- & volume-linked expenses (bonuses, logistics etc.)
- FX-effects of €-17m and material special effects of €30m from the sale of unprofitable facilities

CASH FLOW AND NET DEBT DEVELOPMENT

Cash flow FY 2021 (€m)

- EBITDA reported of €879m
- Mainly price driven NWC increase of €783m; smart NWC management
- Negative cash flow from operating activities driven by NWC increase and funding of so far unfunded pensions provisions
- Net capex of €60m
- Free cash flow accordingly €-366m

Net financial debt 12.2020 vs. 12.2021 (€m)

- Net financial debt increased from €351m to €762m yoy mainly driven by NWC increase

STRONG AND SOLID BALANCE SHEET

A HOLISTIC SUSTAINABILITY APPROACH

OUR COMMITMENT

Provide a clearly defined pathway for companies to reduce greenhouse gas (GHG) emissions, helping prevent the worst impacts of climate change and future-proof business growth. Targets are considered 'science-based' if they are in line with what the latest climate science deems necessary to meet the goals of the Paris Agreement – limiting global warming to well-below 2°C above pre-industrial levels and pursuing efforts to limit warming to 1.5°C.

The SDGs are comprised of 17 individual goals, which recognize that action in one area will affect outcomes in others, and that development must balance social, economic, and environmental sustainability. Economic prosperity, social progress and environmental protection go hand in hand and must be brought together. Thus, all the SDGs are interconnected and must be jointly pursued.

RACE TO ZERO

Initiative from the climate secretary of the United Nations, which was founded for the fight against global warming. It mobilizes a coalition of leading net zero initiatives, representing 1,049 cities, 67 regions, 5,227 businesses, 441 of the biggest investors, and 1,039 Higher Education Institutions. These 'real economy' actors join 120 countries in the largest ever alliance committed to achieving net zero carbon emissions by 2050 at the latest.

Fair Company was founded by "Handelsblatt" in 2004 and is the biggest and most prominent employer initiative in Germany, that supports a fair working environment in a sustainable matter. The focus is placed on young professionals such as apprentices, interns, working students and trainees. Companies that provide young adults with fair working conditions and development perspectives are rewarded by the Fair Company Initiative.

The Business Ambition 1.5 Degree was initiated based on the IPCC's Sixth Assessment report, which was marked as "code red" for humanity. It showcased the need for urgent climate action to maintain a habitable planet for humankind. To avoid the most significant effects of climate breakdown, greenhouse gas emissions must be reduced by 50 % before 2030, furthermore the goal is to achieve net-zero emissions before 2050 and halt global temperature rise to 1.5°C.

DISCLAIMER

This presentation contains forward-looking statements which reflect the current views of the management of Klöckner & Co SE with respect to future events. They generally are designated by the words "expect", "assume", "presume", "intend", "estimate", "strive for", "aim for", "plan", "will", "endeavor", "outlook" and comparable expressions and generally contain information that relates to expectations or goals for economic conditions, sales proceeds or other yardsticks for the success of the enterprise. Forward-looking statements are based on currently valid plans, estimates and expectations and are therefore only valid on the day on which they are made. You therefore should consider them with caution. Such statements are subject to numerous risks and factors of uncertainty (e. g. those described in publications) most of which are difficult to assess and which generally are outside of the control of Klöckner & Co SE. The relevant factors include the effects of reasonable strategic and operational initiatives, including the acquisition or disposal of companies or other assets. If these or other risks and factors of uncertainty occur or if the assumptions on which the statements are based turn out to be incorrect, the actual results of Klöckner & Co SE can deviate significantly from those that are expressed or implied in these statements. Klöckner & Co SE cannot give any guarantee that the expectations or goals will be attained. Klöckner & Co SE – notwithstanding existing legal obligations – rejects any responsibility for updating the forward-looking statements through taking into consideration new information or future events or other things.

In addition to the key figures prepared in accordance with IFRS and German-GAAP respectively, Klöckner & Co SE is presenting non-GAAP key figures such as EBITDA, EBIT, Net Working Capital and net financial liabilities that are not a component of the accounting regulations. These key figures are to be viewed as supplementary to, but not as a substitute for data prepared in accordance with IFRS. Non-GAAP key figures are not subject to IFRS or any other generally applicable accounting regulations. In assessing the net assets, financial position and results of operations of Klöckner & Co SE, these supplementary figures should not be used in isolation or as an alternative to the key figures presented in the consolidated financial statements and calculated in accordance with the relevant accounting principles. Other companies may base these concepts upon other definitions. Please refer to the definitions in the annual report. For other terms not defined in this annual report, please refer to the glossary on our website at <https://www.kloeckner.com/en/glossary.html>.

Rounding differences may occur with respect to percentages and figures.

The English translation of the annual report and the interim statement are also available, in case of deviations the German versions shall prevail.

Evaluating statements are unified and are presented as follows:
