Klöckner & Co: Leveraging Strengths - Step Up 2030

Entering a new strategic chapter: Step Up 2030

Key priority: Expanding our higher value-added business and service center business

Lever towards increasing profitability while reducing underlying volatility

What is higher value-added business (HVAB) and service center business (SC)?

- HVAB: Metal products, which are extensively processed or fabricated before delivery to the customer, for instance with welding and 3D laser cutting systems
- SC: Multi-metal services, such as cutting-to-length and slitting

Why do we want to expand these businesses?

EBITDA before MSE development by business

- Especially HVAB with higher profitability as a result of high degree of product customization
- Longer-term contracts and lower dependence on volatile commodity price developments
- Higher barriers to entry for potential competitors compared to the distribution business, due to the need for specialized equipment, technical expertise and certifications

How do we achieve this?

Product & Service Portfolio Diversification

Strategic Partnerships

Operational Excellence

*) Continuing operations in accordance with IFRS 5.

 - Divested parts of European distribution business, reducing exposure to low-margin, cyclical commodity business significantly
 - Streamlined portfolio further by divesting Brazilian distribution business
 - Transformed distribution warehouses into HVAB centers by investing in state-of-the-art laser capacity and automated welding capabilities

EBITDA before MSE^{*)} development by business

Sales^{*)} split by business

^{*)} Operational Group excl. Holding, consolidations and NMM acquisition (closed on August 1, 2023 and included as of January 1, 2024).
